FOR IMMEDIATE RELEASE

RCD TECHNOLOGY NAMES INDUSTRY VETERAN PHILIP LAZO TO CEO POSITION

Custom Application RFID Provider Prepares for Market Expansion and Accelerated Growth

LAS VEGAS, NV (RFID Journal Live 2008) – April 16, 2008 – RCD Technology, a developer and manufacturer of passive HF and UHF tags, today announced the appointment of Philip Lazo as the company's CEO. A 20-year technology industry veteran, Mr. Lazo has a proven track record in leading the development, deployment, and management of RFID and related automatic data capture technologies in a vast range of industries including healthcare, federal and DOD, travel and transportation and retail supply chain.

RCD Technology serves customers seeking tag solutions; for applications that demand superior performance compared to standard passive tags. The company's products are utilized in a diverse array of applications such as asset tracking, personal credentialing, secure ID, and contactless payment.

"Our tag design and manufacturing capabilities, combined with RFID application expertise, deliver unmatched performance in our markets", said Mr. Lazo. "RCD is well positioned to capitalize on its strong technology and client portfolio, and I am eager to help the company strengthen and extend its leadership position in the market."

Mr. Lazo's appointment follows a recent investment by **American Bank Note (ABN)** and recent notable clients wins with **L-1 Identity Solutions**, a provider of solutions and services that protect and secure personal identities and assets; **Radiant RFID**, a solutions provider and developer of RFID systems for Emergency Management, Security Monitoring, and Access Control.; and **Cubic Transportation Systems Inc.**, a subsidiary of San Diego-based Cubic Corporation (AMEX:CUB) that works with Metropolitan Atlanta Rapid Transit Authority (MARTA).

“RCD is well positioned to extend its leadership in a number of high-value areas within the rapidly growing RFID market. Phil brings a terrific set of industry experiences and relationships to help take RCD to the next level,” said Mike Forgash, partner at Zon Capital. RCD Chairman and NextStage Capital Partner Dan McKinney added, “After a comprehensive search, we identified Phil as being the perfect complement to the manufacturing, operational and engineering capabilities within RCD.”

Prior to RCD, Mr. Lazo served as vice president and general manager for the RFID division at Symbol Technologies; acquired by Motorola corp in 2007. Mr Lazo has also held business development and product management positions at Tyco International and Sensormatic Electronics Corporation.

Mr. Lazo graduated from the University of South Florida, with a Bachelor of Science in Electrical Engineering. He holds two U.S. patents relating to RFID technology and applications.

About RCD Technology Corporation

RCD Technology designs and manufactures specialized RFID tag solutions for applications where standard RFID tags are not suitable. RCD employs its considerable RFID technology expertise to deliver HF and UHF tag solutions, in a diverse array of form factors. RCD products are utilized in a wide variety of industries and applications including: PASS Cards (People Access Security Services) for the U.S. Western Hemisphere travel initiative, Tamper evident labels for asset tracking and authentication, Tags for Medical device tracking; and paper tickets for automated fare collection. The products utilize a patented copper antenna fabrication and assembly process that significantly improves tag performance, quality, and suitability.

For customers requiring solutions for RFID-based asset tracking, E-payment, and secure identification, RCD provides capability to develop and deliver a tag solution, designed for the unique application requirements.
