

FOR IMMEDIATE RELEASE

RCD Technology Makes Key Appointments to Executive Leadership Team

New team members from Symbol Technologies and Topflight lend expertise to RCD's business development team and board

Quakertown, PA, January 31, 2007 - RCD Technology, vertically integrated designer and producer of HF and UHF tags, has expanded its leadership team through two new appointments. The company today announced Todd Hewlin as a director, completing the company's board, and Tom Hartmann as its director of National Third Party Accounts.

Todd Hewlin most recently served as senior vice president of the Symbol Technologies Global Products Group, where he was responsible for the management of Symbol's product business divisions globally. As part of the Global Products group, Mr. Hewlin oversaw mobile computing, advanced data capture, RFID, wireless infrastructure, and mobility software products. Mr. Hewlin was instrumental in orchestrating the recent acquisition of Symbol by Motorola.

"I am excited to be part of an emerging leader in the high-growth RFID market," said Todd Hewlin, director, RCD Technology. "RCD offers a unique capability in tag design optimization and production. The inherent limitations of most RFID device providers hinder the opportunity to enable new applications, but RCD's technology offers a solution to address these manufacturing challenges."

"To have a board member of Todd Hewlin's caliber speaks volumes of our company's competitive advantage, and to the significance of the market opportunity for RCD," stated Jeff White, CEO of RCD Technology. "Todd is frequently sought after for his vision and market leadership within the RFID community and we are thrilled to have him on our team."

In his new role as director of National Third Party Accounts, Tom Hartmann will lead RCD Technology's sales channel expansion throughout the U.S. Previously, Hartmann oversaw the RFID business at Topflight, an industry recognized leader in RFID label conversion.

"I am looking forward to working with RCD's engineers, designers and executive team," said Hartmann. "Having witnessed first hand the limitations and opportunities for wide-

spread RFID adoption, I realize that RCD is in a great position to leverage its unique status as a U.S. based manufacturer to serve this growing global market.”

“RCD will benefit greatly from Tom’s experience and cooperative development approach to providing the best RFID solutions for our prospective customers,” noted Jeff White, CEO of RCD Technology.

About RCD Technology Corporation

Headquartered in Quakertown, Pennsylvania, RCD Technology is helping revolutionize the growing RFID industry. Employing a patented copper antenna fabrication and assembly process that significantly improves tag performance, quality and suitability while reducing the time to market and waste associated with RFID custom tag manufacturing, RCD produces a wide array of custom HF, UHF, and industry-specific RFID inlays, complete tag assembly and finished product services.
